

EDUCATION

Master of Computer Application, BMS College of Engineering	2024 — 2026
Bachelor of Computer Application, Oxford College	2021 — 2024
PUC(PCMB), Christ college	2019 — 2021

TECHNICAL SKILLS

Languages	JavaScript, Python, PHP, C, Java .
Technologies	NodeJS,Restfull API's ,ExpressJS, MongoDB, Sql ,ReactJS,.
Tools	Git, GitHub, Linux, Git Bash, VS Code.
Soft skills	verbal and non-verbal communication skills, Critical thinking, Analytical skills, Proactive.

PROJECTS

Site-Crafter (Link) JUL 2025 — SEP 2025

- Built an AI-powered website that automates web development measured by reducing development time for users by 70% by integrating **real-time markdown, web containers, and code generation**.
- Engineered a scalable and efficient platform measured by ensuring high performance and security by leveraging **TypeScript, Node.js, React.js, Tailwind CSS, MongoDB, and Google OAuth**.
- Enabled non-technical users to create professional websites measured by eliminating the need for coding knowledge by incorporating natural language processing for instant frontend and backend code generation.

Offline Sight Voice (Link) MAY 2025 — JUL 2025

- Delivered real-time assistive narration with average latency <2s by deploying **YOLOv8 (MS COCO)** and pretrained **ResNet (Places365)** on a **FastAPI/Uvicorn** backend and a **React Native/Expo** TTS client over local Wi-Fi.
- Engineered privacy-preserving offline operation achieving **100% local (no-internet)** sessions during testing by designing a LAN client-server with session IDs, **/health** readiness checks, and a **~MB** model footprint for low-cost servers.
- Implemented reproducible deployment pipelines using public datasets (**MS COCO, Places365**), **PyTorch/YOLOv8**, and Colab notebooks, exposing inference via **REST** endpoints for mobile integration.

PathGPT (Link) NOV 2024 — DEC 2024

- Designed and deployed an **AI-driven** career recommendation platform using the **MERN stack** and Gemini API, enabling personalized career and course guidance for over 150+ users.
- Leveraged the Gemini API for advanced natural language understanding, enhancing the accuracy of career suggestions by 95% and improving the overall **decision-making** experience for users.
- Built a responsive and intuitive frontend interface with React.js, ensuring seamless interaction and high engagement, processing 1000+ user inputs daily.

PROFESSIONAL EXPERIENCE

Python Full Stack Developer (Intern) APR 2024 — OCT2024
Qspiders(Incubation Program) Bengaluru

- Technical proficiency and analytical abilities** enhanced by hands-on experience with **Python, SQL**, and **problem-solving techniques** during the QSpiders internship, resulting in superior coding skills and data analysis capabilities.
- Proactive approach to learning and **professional growth**, demonstrated by seeking out new challenges and opportunities to expand **technical skill set** and stay up-to-date with industry trends.

CERTIFICATES

- Data Analytics Essentials By Cisco(Link)
- Full stack Vue JS Express MongoDB By MindLuster(Link)

AWARDS & ACHIEVEMENTS

- Won 2nd place** in a hackathon for developing “VipraCo” – a multi-tenant HR assistant chatbot with intelligent backend integration, enabling smart query resolution from simulated HRMS data.
- Shortlisted among the **top 40 teams nationwide at the Qualcomm Edge AI Hackathon 2025 (Bengaluru)** — delivered a working browser-based prototype “Nutrigo” in a 24-hour sprint, implementing on-device meal recognition and offline calorie estimation (WebAssembly/Web ML, NPU optimizations) with multilingual support.
